Hello
I am Emmanuel Enya.

Specialised as a mobile Android Engineer.

Phone: +2348188837623
Email: enyason95@gmail.com
Github: https://github.com/enyason

Skills

- Proficient level understanding of Kotlin, Java and Dart
- Fundamental understanding of Android development practises; life cycles, network calls, Async, Reactive programming (Rxjava), databases, responsive UI, state retention and data binding.
- Intimate familiarity with design patterns such as MVVM and MVP
- Dependency Injection, Integration and unit testing, version control (Git)
- Can work effectively in Agile/Scrum environments and pair programming
- Great communication and writing skills.

Experience

June 2021 - Current
FrontEndLabs, London (Remote) - *Senior Android Engineer (Contract)*

- Worked on several clients projects, adhering to clean architecture, unit testing and modular design.
- Built android app UI with Jetpack compose.
- Participate in code review to ensure the overall code quality of the projects.
- Recommended patterns and architecture for projects.

September 2021 - Current
Azenia, Kenya (Remote) – *Senior Android Engineer (Contract)*

- Built reusable UI custom components with XML.
- Fixed bugs discovered from existing features.
- Participate in code review to ensure the overall code quality of the project.

October 2020 - August 2021
Scienta Consulting, London (Remote) - *Android Engineer*

- Work on clients projects with strict adherence to clean architecture, unit testing, and design patterns.
- Participate in rigorous code review to ensure the overall code quality of the project.

- Help onboarding new staff especially in setting up a new environment.
- Gained good experience in debugging network issues with Charles Web Proxy.
- Gained solid exposure to agile development and TDD.
- Developed interfaces for communication between NFC devices.

August 2020 - December 2020

Ijese Tech Lab, Lagos (Remote) - *Android Developer(Contract)*

- Built inventory software with store management for customers.
- Brought MVP project to production.
- Handled permissions and security.
- Recommended and used Clean Architecture, MVVM, and DI with Hilt.

February 2020 - January 2021

Jiggle, Uyo, Akwa Ibom - *Android Developer*

- Worked with the development team to build new features on a payment mobile application.
- Fixed existing bugs and handled crashes.
- Worked closely with the backend engineers, to ensure smooth integration of backend APIs on the client-side(Android).
- Full ownership of the companies product UI development, working closely with the UX team and QA

August 2019 - May 2020

SprintHub Mobile, Port Harcourt, Rivers - *Android Developer*

- Developed Kotlin skills whilst being introduced to Reactive programming and Clean Architecture.
- Was able to write unit tests on an existing application
- Handled crashes.
- Gained initial commercial experience with Android.
- Further development of TDD.
- Solidified knowledge in agile development methodologies.
- Built high-performing, scalable enterprise-grade applications.
- Gained a very good understanding of Git version control and have been able to integrate the use of it in my own personal projects.

- Worked closely with business colleagues to help shape requirements, deliver suitable solutions and support existing functionality.
- Participated in paired programming

December 2018 - March 2019

R2H-Live, India (Remote) - *Android Developer*

- Designed and built a movie repository mobile App.
- Gain solid exposure to Model View Presenter(MVP) and Exoplayer in Android

July 2017 - October 2017

Code Path Internship (Remote) - *Android Developer*

- learnt how to build complex UIs with XML and Java
- Built a movie browser app android app

Related Experience

March 2021 - Current

Dev.to - *Technical Writer*

- I write on modern android topics. - https://dev.to/enyason

Education

October 2013 - September 2018

University of Uyo, Uyo - Akwa Ibom State - *B.Eng Computer Engineering (First-Class Honours)*

March 2018 - September 2018

Google Africa Scholarship Android Developer Course - *Android Development*

Certifications

2020

Associate Android Developer
https://www.credential.net/967b6d16-aa82-45b0-95e2-3123cd3efe08

2018

Google Africa Scholarship Android Developer Course
